## New Overstitching Sewing Machine,

FOR

FURS, GLOVES, CLOTH,

CANVAS, CARDIGAN, CARPETS, ETC.

190 SPRING STREET, N. Y.

---

This is the only machine suitable for the purpose, and possessing sufficient strength for sewing Robes, Muffs, Cloaks, Hats, Caps, etc, with perfect satisfaction.

The machine is run very easily, the mode of operating it can be learned in two or three hours; and having all the latest improvements it can be readily regulated. It is constructed to sew in any required widths, the stitch being changed at will, and it has already proved to be indispensable for sewing Furs of every description. In every instance where the machines have been tried, a number have been purchased.

An operator on one of BOLAND'S machines can do as much work, the sewing being BETTER and STRONGER, as five persons can perform by hand—which greatly lessens the cost.

---

### SIZE OF MACHINES.

No. 1. *For Sewing all kinds of Furs.*

No. 2. *For Sewing Buffalo Robes, or any heavy stuff.*

No. 3. *Is specially adapted for sewing fine Gloves.*

---

N. B.—The principal claim of the patent, namely, the support of the front disk being above, is used in Nos. 1 and 2. In No. 3 it is UNDERNEATH as in all glove sewing machines. The inventor has however kept the SAME CENTRAL MOVEMENT of the foot in all his machines. He has done away with all springs and has constructed his machine so as to sew different sized stitches at will.
